A young boy with dark hair, wearing a yellow t-shirt and a black backpack, is smiling and making a peace sign with his right hand. He is standing in front of a modern building with a blue facade and greenery in the background. The t-shirt has the text 'ARTIC DENIM' and 'ONE' visible, along with a 'LIMITED EDITION' logo with a star.

**STRIVE NOT
TO BE A
SUCCESS,
BUT RATHER
TO BE OF
VALUE.**

Aveti In This Issue....

Namaskar, Aveti has become a beacon of hope for the students of Odisha's least developed areas. But our objective is not only to complete the annual curriculum; rather, we are entering a bigger universe. Aveti is currently taking timely measures to strengthen the talents of youngsters. Some children desire to learn how to code, while others wish to travel to space. Aveti has initiated a high-level skill development programme in deference to everyone's objectives and morale. The 'Aveti Summer Coding Program : 2022' is created for gifted kids who wish to learn to code during the summer vacation. In addition, a specific curriculum, Aveti Bridge Course-2022, has been designed for students who wish to pursue science after the 10th grade. You will discover all of the details inside.

Aveti Bridge Course: From bleak to bright

To make aspirations come true, one needs a solid foundation & proper guidance.

In order to address the genuine problems faced by Odia medium students who pursue Science after class 10, we have started a unique curriculum - Aveti Bridge Course.

Aveti Bridge Course is a four-week program that is designed to cover the foundations of Physics, Chemistry, and Mathematics. English is also taught to improve the communication skills and scientific vocabulary of the students coming from Odia medium.

Over the course of the four weeks, the students attend live online classes, solve curated assignments and study carefully designed notes to learn the basics. All these learning resources are also provided to the students through the 'Aveti Learning App' so that they can learn at their own pace.

A select group of students also attend the same classes at our Bhubaneswar facility and get to interact directly with our highly experienced teachers. This year we have hosted eight deserving students from different parts of Odisha for the bridge course. All these students are provided comfortable housing and healthy food and study at our facility for 8 to 10 hours a day. In addition, each student is provided with a personal computer to access and practice the learning resources provided in the 'Aveti Learning App'. As a means of recreation, these students are taken on tours to some of Bhubaneswar's educational and cultural landmarks every Sunday.

The Aveti Bridge Course is one-of-a-kind initiative in which children not only learn their syllabus but also other important life skills.

Why Bridge Course?

- ➔ First of all, the heavy curriculum of class 11 and 12 Science is difficult to tackle without a solid foundation.
- ➔ Secondly, class 11 & 12 Science curriculum is in English, which is difficult for Odia medium students to grasp.
- ➔ Another crucial component is to understand the interdependency of Physics, Chemistry & Mathematics without which the learning would be incomplete.

Chinmaya has finished learning a high-level programming language, in just four weeks

STUDENTS' CORNER

Aveti Learning has demonstrated once again that education is not just about exam preparation; it is so much more than that. Aveti believes that children should be allowed to attain their greatest potential. Going beyond the books, some children are now showing their excellence in Coding. Chinmaya Kumar Majhi, a standard-nine student, is one of these outstanding kids who completed a coding course in just four weeks. Most notably, Chinmaya is able to do all the programming in the ninth grade that only an engineering student can do.

Chinmaya was born in Halupali, a village in Odisha's Bargarh district. Since sixth grade, he has been attending the Banjipali High School dormitories, located 40 kilometers from Halupali village. Chinmaya always had a propensity for trying new things and achieving new goals. He was inspired to try something new by his drive to learn. In the first place, he learned Arduino Technology all by himself and created a clever gadget he claims will alert individuals to the COVID flare-up. Chinmaya expressed a desire to learn computer programming. Chinmaya's eighth-grade exam has now been finished and to make the most of his vacation time, he has arrived at the Aveti Learning centre in Bhubaneswar. Chinmaya is now an integral part of the 'Aveti Summer Coding Program'. His coding lessons are being mentored by Shuvendra Kushwaha, a Software Engineer at Aveti Learning. Chinmaya has finished learning 'Python', a high-level programming language, in just four weeks since he arrived. "Coding is all about logical thinking and problem solving, and I am glad to get exposure to these things early in my life", says Chinmaya.

Chinmaya expressed an interest in programming languages and took up the opportunity from Aveti Learning to learn Python. We want this opportunity to reach more of these talents like Chinmaya. Again, we don't want to limit ourselves to coding workshops. This world is brimming with possibilities. If a child aspires to write codes like Mark Zuckerberg, others should try talking like Barack Obama. So, it's up to you to figure out 'who is the next Chinmaya'!

5T SCHOOL TRANSFORMATION PROGRAM

Second Phase Training in Nabarangpur

Aveti Learning has commenced the second phase of Capacity Building Training on Blended Learning program in Nabarangpur, in collaboration with Nabarangpur District Administration. Back in November 2021, Aveti Learning Smart Class was installed in a total of 12 schools in Nabarangpur. Currently, a total of 78 schools in Nabarangpur are offering Aveti's high-quality content to children. The second phase of the Integrated 'Capacity Building Training of teachers' Program was held on June 5 and 6 in Nabarangpur. The event was held at two schools in Nabarangpur - RCD Nodal Govt. HS and Nodal Govt New Panchayat High School, Jharigam. The training program was attended by 100 teachers from a total of 50 schools. All of these teachers were given skills development training by Aveti's well-versed trainer Ban Bihari Kar.

Coffee, lush valleys, education. Koraput?

Aveti Learning attended a high-level conference on the "5T School Transformation Program in Koraput" on June 5. The conference was convened by the Pottangi School Level Academic Enrichment Committee and presided over by the Pottangi Block Development Officer. At the event, there was also a presence from the Block Education Officer (BEO). In addition, well-respected headmasters from a range of Pottangi schools were present at the conference. All conference attendees chose 'Aveti Learning' as a source of e-learning content and agreed on teacher capacity building training. The Block Development Officer's involvement in this particular initiative is noteworthy, as he took a keen interest in Aveti's e-learning content and quickly instructed all seven schools in his block to incorporate the learning resources. In order to get the new initiative off the ground, Aveti Learning and the BDO of Pottangi Block came to an agreement and signed a memorandum of understanding.

(A group of inquisitive students from Silicon College of Engineering and Technology are being briefed at the Ohub office, by the Director Mr. Sushant Kumar Mahapatra himself, on the overall structure of Aveti Learning and the dynamics of the ecosystem it operates within. "Sharing is the key to happiness!")

Aveti Learning on DD Odia

The wonderful tale of Aveti Learning was aired on Odisha's premier television channel DD Odia's special show 'Aam Udyoga.' The show highlighted how Aveti Learning serves as a beacon of hope for children living in remote and underprivileged communities. Children from low-income families struggle in school not because of a lack of talent, but because their education is inadequate and substandard. "The initiative was initiated in 2014 by a small tuition centre, and since then it has expanded to encompass more than 120,000 students and more than 700 schools", stated Sushant Kumar Mahapatra, the Director and Co-founder of Aveti Learning.
