Excellence in education will remain a central focus for Aveti Learning throughout perpetuity. The total comprehension of students is directly proportional to the level of quality and expertise they get in the classroom.

Editor-in-chief

# THE BARGARH STORY

Bargarh, a site of the world-famous Dhanuyatra festival and a region known for its picturesque waterfalls and verdant hills, envisions the future of today's schoolchildren becoming bright and beautiful in light of all the splendour around them. Bargarh District Administration and Aveti Learning are shouldering the responsibility of bringing these youngsters one step closer to educational attainment and success. The Collector of Bargarh district and Aveti Learning signed a Memorandum of Understanding (MoU) on the very first week of August for the Smart Class Installation Project in 5T High schools. The agreement specifies that Aveti Learning will install Smart Classrooms in all 5T high schools in the Bargarh district. So far, Aveti Learning has installed Smart Class in 183 government 5T high schools of Bargarh district and the most important and noteworthy thing is that within 15 days of signing the agreement, Aveti's Smart Class has become operational in 179 schools. This installation of smart classes in such a short span of time was made possible not only by the Aveti team, but also by the District administration that includes the DEO, the ADEOs, the DSS of Bargarh.

The Aveti team certainly couldn't have done its job without the unwavering support of the respective school's administration and faculty. In the month of September, all of the district's schools have used a total of 3,88,825 minutes of video sessions and 1,47,380 minutes of assessment units. As of this writing, a total of 2014 minutes of training on blended learning was imparted to the teachers.

**"It is an honour for Aveti Learning to work with the Bargarh District Education Authority. With the ample help of the management, we could set up 179 smartclassrooms in less than 15 days "**

# AVETI'S PROVEN SMARTCLASS INSTALLED IN UNIT-8 SSVM, BHUBANESWAR

Aveti Learning's 'Hybrid Smart Classroom Program' was implemented at Unit-8 SSVM in August. This school first opened its doors in the year 1983. Unit-8 SSVM is one of the many highly regarded private schools in Odisha, and its students consistently perform well above the state average on the BSE Odisha Class 10 Board Exam. This school, which first started with two teachers and 33 students, now has a total enrolment of 1,750 students, and 70 of its teachers are committed to educating children in pre-primary through tenth grade. A total of 5 Smart classes have been installed by Aveti Learning and there are plans to install Smart classes in another 5 classrooms in near future. Along with the implementation of Smart classes, 60 of the school's teachers have received training on Blended Learning from Aveti's knowledgeable trainers. The best part is that many teachers are well past the typical young-adult age group, yet they have no trouble whatsoever using Aveti's user-friendly technology to illustrate each topic visually and provide engaging interactive sessions.

Aveti Learning is now providing Smart Class facility in more than 900 government 5T schools in many districts of Odisha. Transparency, technology, teamwork, time, and transformation are the 5'T's, as suggested by the name. This innovative system of Odisha government can be seen to be very effective as well. However, upon looking closer, it is clear that

these qualities are also reflected in Aveti's Hybrid Smart Classroom Program, which is currently being implemented in private schools. In this case, we can look at the example of the Unit-8 SSVM. The installation work was carried out in a manner that exemplifies clear teamwork by the Secretary of the school, the Chairman, the Principal, The Director of Aveti Learning, and Aveti's implementation team together. Not only do the teachers discover that the technology is simple to use, but their level of experience in the field of technology also continues to expand. After smart classes are installed in the school, the teachers can monitor the academic progress of students through a digital dashboard provided by Aveti Learning. It is definitely maintaining a transparency between teachers and students. Then comes 'Time'. All of the smartclass installation work for Unit-8 SSVM was finished by Aveti's trained and skilled staff in just one day, allowing teachers to begin teaching the very next day. At last, Transformation. The fundamental goal of the Aveti Hybrid Smart Classroom Programme is to accelerate the academic growth of children by facilitating the timely completion of hardware installation work, providing teachers with precise data about the progress of their students, and encouraging teachers to work together.

## SUCCESS REQUIRES CONSISTENCY : SWARA

In light of the heated competition that exists in the world, it takes real skill to distinguish and differentiate oneself from the crowd. Having this ability is not always something that comes naturally; rather, constantly practicing new ways to express oneself is required. Swara Somya Das is a brilliant illustration of this principle. A native of Alanahat, Jagatsinghpur, Swara Somya is the only child of Satyaprakash Das and Manorama Das. She is ambitious and driven enough to pursue unique tasks despite her average academic achievement. Swara, who received an overall score of 85% on the matriculation exams that was just made public, is currently pursuing her education at Sailabala Women's College in Cuttack. School and life in general were challenging for Swara since she placed a higher value on talent than on academic performance. The Corona pandemic posed a challenge for Swara, who was attempting to balance her studies with the limited income of her father. Swara, like other youngsters, had her education hampered when schools were closed and coaching was halted. During the pandemic Swara was dismayed to discover that many YouTube tutorials were of poor quality as she had always desired to learn more than what could be obtained from textbooks.

It was when, she found that Aveti Learning was one of the most effective ways for her to learn. She embarked on an entirely new course of education after becoming familiar with the Aveti Learning app and the Aveti Learning YouTube channel. Swara had her doubts and questions answered by Aveti's knowledgeable instructors who led regular online classes. She really valued Aveti Learning's curriculum-based classes as well as other relevant facilities the institution offered. Swara says that the 'Aveti Spoken English Class' is responsible for her enhanced ability to communicate in English. After she finished her matriculation exams, she joined in the Aveti Bridge Course Program, a special initiative started by Aveti, to give her ambitious spirit a boost. In this program, Swara could prepare for Class 11 Science along with other friends. Swara is an individual with her own set of tastes and priorities. She hopes to become an astrophysicist in future. May all of Swara's dreams come true, and may she continue to dream in this way.

# IF YOU CAN SPEAK ENGLISH, SO CAN I !

By Mrs. Sanghamitra Joshi,  
Master teacher at Aveti Learning & Educationist

**L**anguage is the greatest gift that was given to mankind. It is also the most useful instrument for communication all around the world, with English being the format that is utilised the most. Did you know that English, in parallel to Hindi, is the language that is taught in the majority of schools in India as a second or third language? In everyday conversation in India, we use the equivalent of several thousand English words. Then why do some of us have such a strong aversion to communicating in English? There are actually two possible explanations here. - To begin, we are subjected to this kind of pressure from society, which is a status symbol. When people say things like, "You can speak English, that means you are HIGH CLASS and if you can't speak English, that means you are LOW CLASS," it creates a sense of inferiority that slows down the process of learning a language.

We can help you emerge out of your complexities, increase your self-confidence and self-esteem, and bring you to the realisation that "if you can speak English, so can I." This is what we do here at Aveti. The second reason is that we were taught to be afraid that learning English would be difficult. It goes without saying that mastering anything new is not an easy task, right? On the other hand, picking up a new tongue isn't exactly complicated. We will help you conquer that fear here at Aveti, and show you that if you can master Hindi, Telugu, and German, then there is no reason why you can't also master English. Join up with Aveti to discover the excitement and simplicity of communicating in the language known as English.
